

## Teacher Safety Bag Summary

General Strange,

Included in our packet, that has been submitted for The Attorney General's Safe School Initiative, is a picture of teacher safety bags. Each classroom, including the main office, is issued one of the bags at the beginning of the school year. These safety bags are to be stored in the classroom in an easy access area so that the faculty member can retrieve it in the event of a crisis situation. In addition, these bags are used during all safety drills throughout the year.

These bags contain items that would aide a faculty member in increasing efficiency and accountability during an emergency. The safety bags contain short distance walkie-talkies that allow for communication with first responders and other faculty members. Also included in the safety bag is a map of the local area that will provide directions in the event of an evacuation.

## Safety Bag Description for Redland Elementary School

The Safety Bags used at Redland Elementary School were designed for efficiency and responsiveness in the event of a crisis/emergency situation.
